

Decimal Division Top – It

Materials: Number cards, 4 each of the numbers 1-10, Decimal Division Game Boards, scrap paper & pencil

Number of Players: 2 or 3

Directions: Use the cards to generate division problems involving decimals.

A player shuffles the cards and places the deck number-side down on the playing surface.

Players take a “Dividend” game mat and a “Divisor” Decimal Division Game Board. Players then turn over cards (players should turn over the amount of cards that matches the number of blank spaces on their Decimal Division Game Boards).

Using the turned over cards and their Game Boards, players should form a dividend and a divisor. The player with the largest quotient wins a round.

Note: Players should be encouraged to use scrap paper to help with calculations if need be.

The player with the most cards by the end of play wins the game.

Advanced Variations:

The game can be made simpler or more difficult depending on the Decimal Division Game Boards used.
