

How To Play Doubling Dice

1. Take a sheet and two dice (dot cubes).
2. Roll the dice. Use the numbers to make a two-digit number (ten/ones).

For example, if I roll

I can make **26** or **62**.

3. Write your number in the "I rolled" box.
3. Break your number into "friendly" tens and ones.
4. Double your number. Show your work!

Challenge Version:

Use three dice and make 3-digit numbers (hundreds/tens/ones) to double.

Name: _____ Date: _____

Doubling Dice Game

I rolled . . .	Double It! Show your work. Use parentheses to add the friendly tens and the ones.
Example ↪ 26 <hr/> $20 + 6$	$(20 + 20) + (6 + 6) = \underline{52}$ $40 \quad 12$

(over)

I rolled . . .	Double It! Show your work. Use parentheses to add the friendly tens and the ones.
