

# Math Rack Build It!

## You need:

- \*a Math Rack
- \*a Number Line

## Directions:

Play with a partner.

1. Place the Math Rack above the number line tape.
2. Player 1 chooses a number (2-19) on the number line. Player 1 builds the number on the Math Rack. It is okay to use beads on both the top and bottom rows.
3. Player 1 and Player 2 talk to decide if the quantity on the Math Rack matches the number.
4. Player 2 builds the same number on the Math Rack in a different way.
5. Player 1 and Player 2 talk to decide if the quantity on the Math Rack matches the number.
6. Keep playing, taking turns choosing new numbers (2-19) on the number line and building in two ways on the Math Rack.
